

We apologize for any inconvenience as we finalize our route schedule to best service your community. There have been a few minor adjustments to the service map. Please review the new map. The service changes will become effective on the week of June 20th.

LRS is excited to recently become the City of Monmouth's new residential waste hauler. We have a great appreciation for the high standards Monmouth residents have when it comes to service, quality and value. We look forward to exceeding those expectations. LRS is a midwest leader with a local operation established right here in Monmouth! Under the City's new contract with LRS, residents will see cost savings compared to other bidders along with enhanced services for the next seven years.
